STEP 7: THE SOFTWARE HAS BEEN CREATED.

The screenshot shows a web application interface for 'Booking Movie Ticket'. On the left is a dark sidebar with a menu containing 'User Details' (selected), 'user details', and 'All User Details'. The main area displays a 'user details' form with the following fields: 'Name' (split into 'First Name' and 'Last Name'), 'Phone' (with a country code dropdown set to '+91' and a value '81234 56789'), 'Email', 'Date-Time' (with a calendar icon), 'Theatres' (split into 'First Name' and 'Last Name'), and a 'Drop Down' menu. At the bottom of the form are 'Submit' and 'Reset' buttons. On the right, a 'Form Customization - Web' panel is visible, showing 'Label placement' options with various input field layouts.

This screenshot shows the 'Form Customization' interface for the 'user details' form. It is divided into three main sections. On the left, 'Basic Fields' are listed with icons: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The center section displays a list of the form's fields: Name, Phone, Email, Date-Time, Theatres, and Drop Down. On the right, the 'Field Properties' panel for the selected 'Name' field is shown, including options for 'Field name', 'Field link name', 'Validation' (with a 'Mandatory' checkbox), 'Display Fields' (with checkboxes for 'Prefix', 'First Name', 'Last Name', and 'Suffix'), and 'Data Privacy'. A 'Done' button is located at the top right of the customization panel.

Result:

The product sealing system was created successfully.
